Redesigned for Steam, BADLAND: GOTY Edition builds on the stunningly atmospheric, hand-painted graphics of the original BADLAND with enhanced, above Full-HD visuals, completely redesigned controls, over 15 hours of single player campaign and awesome multiplayer fun for up-to-four players with both local co-op & battle modes.

BADLAND is an atmospheric side-scrolling action adventure platformer set in a gorgeous forest full of various inhabitants, trees and flowers. mobile version is better. Badland is a very fun and beautiful game, it is the ideal type of game to play with friends, whether in co-op, versus or even single-player modes to release new stages in a fun way. The game is very simple, you are a black creature that has to float around the scene until you reach the end of each stage. The scenarios are very diverse and interesting, the learning curve of each mechanics of each stage is very well done which makes the game very accessible for those who are looking for a challenge, because yes, the game has very challenging stages. The main tip is: do not play Badland if you are stressed, some of these stages will make you even more stressed and you will not relax (especially in the Doomsday section). Call your friends and have fun together for these challenges.
